SA Team Hub

A dashboard and agent for running a Solutions Architect team

▲Vercel

WHO

SA Manager
Sees the whole team, including talent data. Approves promotion cases and picks the AI model.

Solutions Architects
See and update their own wins, skills, plans and deals; can view the team's Skills Matrix.

HOW THEY GET IN

One sign-in
A signed session cookie shared by dashboard and agent

Dashboard
Home, Achievements, Skills, Dev Plans, Deals, Talent, AI Usage, Settings

Chat
"Ask the agent" side panel on every page

Slack
DMs, @mentions, approval buttons, weekly digest

EVE AGENT

Main agent (router)
Everyday asks, then hands specialist work on with the user's own access. `get_my_action_items` `log_achievement` `send_shoutout` `review_deal_coverage` `find_skill_gaps` `save_weekly_digest`

deals
Coverage, Top 5 scorecard, next steps; managers create and assign deals.
`update_deal_next_step` `update_deal_scorecard` `manage_deal`

Skill: technical win plan

skills_and_plans
Skills Matrix, gaps, dev plans, career goals.
`update_skill` `update_dev_plan` `update_career_goal`

Skill: dev plan coaching

talent managers only
9-box, retention, promotions, succession, warm bench.
`draft_promotion_case` `update_retention_risk` `update_succession`

Skill: promotion cases

Workflow: promotion case
Gather → score → draft → wait for the manager → decide

Task: shout-out
Waits for the recipient to accept

Schedule: Friday digest
Posted to Slack; can't read talent data

DATA

One data layer
Shared by pages and agent; every read and write checks who is asking.

Neon Postgres
Team, skills, wins, plans, deals, digests, settings.

Management eyes only
9-box, retention, promotions, succession, warm bench.

BUILT ON VERCEL

Next.js 16
Cache Components: every page a partial prerender, shells from the CDN, cached digest

eve
Agent, subagents, skills, Slack channel

AI Gateway
Chosen model, fallback provider, spend by feature and person, $1 cap per chat

Workflows
Durable promotion cases and shout-outs

Neon
Postgres from the Vercel Marketplace

SECURITY

1 · Pages
Role checked on every page.

2 · Tools
Manager-only tools blocked; sensitive changes confirmed.

3 · Data
Every query checks who is asking; fails closed.

4 · Agent
No shell, file or web access.

5 · Specialists
User's own access; talent absent for SAs.
